

Navarre

THE WINE ROUTE

This route of 133 kilometers, crosses lands dedicated to vines, already known by the Romans in the 1st century. Visitors can taste exquisite wines of Lower Mountain and Upper River areas, both awarded the Denomination of Origin Navarre.

From winery to winery, one will see ancient places, such as Roman villas in Eslava or Santacara, defensive towns like Gallipienzo, Aibar or Cáseda, hanging from hills and mountains like San Martín de Unx, impressive centres of Christian faith such as the Monastery of the Oliva or the Sanctuary of Santa María de Ujué or the beauty of the city of Olite, where Middle Ages reached its peak in Navarre.

All this in a natural environment of strong contrasts, between the river and the mountain, the Aragon and Cidacos rivers, or the Laguna de Pitillas, the second largest and most important for its rich birdlife of Navarre.
